

A consulting engineering firm committed to technical excellence, DECON's services help build, maintain and improve our clients' infrastructure and facilities. Our goal is to always deliver exceptional engineering services that deliver projects on schedule, within budget, and with commitment to outstanding quality that meets our client's complete satisfaction.

DECON's roadway and drainage engineering consulting services are mostly focused on Design/Build and P3 projects for the Departments of Transportation in the states where we have been practicing during the last 20 years. We help our clients identify opportunities to increase profitability by reducing time on construction and improving safety on traffic operations. We specialize in providing practical solutions to complex technical situations using cutting edge technology.

Each project benefits from the hands-on expertise of our most senior professionals — Fulvio E. Jaramillo, PE, F.SEI and Jorge L. Alba, PhD, PE, CFM. This assures clients and the project team of seasoned, well-rounded principals who bring innovative approaches balanced with real-world problem-solving expertise. DECON serves the following markets: transportation, heavy civil, industrial, commercial, institutional, residential and civil/site.

Founded in 2010 and headquartered in Houston, TX, DECON has offices in Atlanta, GA, and Arlington, VA, providing engineering design services using BIM/BRIM technologies based on Autodesk® and Bentley® platforms.
