

DECON offers specialized Roadway & Drainage services, concentrating on Design-Build, Plans, Specifications & Estimates (PS&E), and trail development projects. With a strong presence in multiple states, we have an established reputation for excellence and customer service with Departments of Transportation, local and regional agencies, and toll road authorities. Our expertise lies in identifying opportunities to reduce costs by optimizing construction sequencing and improving traffic safety operations. We utilize the latest versions of macro- and micro-simulation traffic modeling software to analyze the potential impacts to road users under various scenarios. Our commitment to meeting stringent industry standards ensures comprehensive constructability reviews, providing our clients with innovative and efficient solutions that optimize project outcomes.

3-Dimensional Traffic Modeling

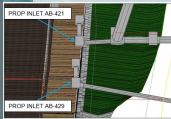

Sam Houston Tollway East from SH 3 to SH 225 Convert East Toll Plaza to Ultimate AET PS&E Package 2, Harris County, TX

Trails Connectivity: tollways to Trailways, Harris County, TX

CAPABILITIES

- Roadway / Highway Design
- Temporary & Final Roadway Drainage Optimization
- Traffic Control Plan (TCP)
- Traffic Modeling & Redesign/Optimization
- Hydraulic and Hydrologic Studies
- Final and Temporary Drainage Design
- Retaining Walls
- Signing and Pavement Markings
- Traffic Signalization
- Stormwater Pollution Prevention Plan (SW3P)
- Utility Conflicts Management & Resolutions
- Feasibility Study for Bicycle Pedestrian Facilities
- Intersection Improvements
- Signal Timing
- Envision Sustainability Analysis
